33rd Conference on  
**Our World in Concrete & Structures**  
25 – 27 August 2008: Singapore

with special emphasis on Sustainability

### INVITATION

The Building and Construction Authority of Singapore announced the launch of a bold initiative in January 2005 to promote environmental sustainability in Singapore's construction industry and raise the awareness among developers, building owners, and industry professionals on the environmental impact of their projects. Globally there is also much to learn about sustainability from other countries that have made much progress in sustainable infrastructure development. Sustainability has also opened up new fields and areas of research involving materials technology, design, construction and management. The vision for the concrete industry's role in our constantly evolving man made living habitat should be about sustainability on multi levels: social, technological and environmental. Thus OWICS08 will have SUSTAINABILITY as its theme.

We invite original papers of relevance to this theme and look forward to your active participation.

#### Conference Awards

We are further pleased to announce that HOLCIM will sponsor an AWARD at the Conference for an original and outstanding paper on the area of 'Sustainability'. The award will include a 'cash grant' to the recipient. All papers (except invited and keynote papers) presented at the Conference will qualify.

The Conference has 10 other traditional AWARDS for original and outstanding papers presented at the Conference sponsored by RMCAS, JCI, ACI-SC, STUP, WAK, ELKEM, BASF, CI-P(Ken Francis and T Javor) and the WR GRACE award for an outstanding young researcher below the age of 35).

#### Special Dedication

OW08 will be dedicated to Professor Nobuaki Otsuki of the Tokyo Institute of Technology, Japan for his continued support and long association with this conference series.

Conference Chairman  
Prof Gary K C Ong
